

“As a society, we must measure ourselves by how we care for the most vulnerable among us.

In this, there is no “system” to bear the responsibility we share in our communities, in our homes and in our institutions.

We ARE the system. This is the hard lesson we are learning as those who can no longer care for themselves grow in number.

Person to person, we are each called to meet an unprecedented caregiving challenge. I formed ElderCare Advisors to make a contribution to this effort.”

*Joseph A. Jackson, President
ElderCare Advisors, Inc.*

Joseph A. Jackson, LICSW, CCM, founder of ElderCare Advisors, Inc., has extensive clinical and administrative experience in health care, mental health, disability care and geriatric services. He is the author of *Health Care Without Medicare*, a new practice manual for community-based care management. Jackson is a specialist in **Community LifeCare Planning**, a profession that addresses financial, legal, personal and social issues as they impact health care for those with chronic health problems.

ElderCare Advisors, Inc. has developed local networks of community-based long-term care professionals providing the highest quality care planning services at the lowest cost. Its corporate mission is to create innovative lifecare options for elders and the disabled in their own communities.

- ▶ Assisted living & housing alternatives

ElderCare Advisors, Inc.

is a unique affiliation of health care, legal, counseling, and financial planning professionals. We connect these services in a meaningful way to create a lifecare approach to the challenges of long-term care.

Our services begin with an initial assessment, usually conducted in the client's home. A care manager meets with clients and their families to evaluate the care-plan options. Skilled in home-care coordination, counseling and community resource access, our care managers develop a plan that ensures clients receive the help they need. Specialized financial planning or legal services may be recommended following a clear explanation of the anticipated costs and the likely benefits.
